KIT & GSPro USB-C Connection

Launch Monitor Support

This document is designed to help with connecting the KIT and the GSPro Connection Application via a USB-C after installation.

- 1. Power on the Laptop. Make sure it is connected to the local Wi-Fi network.
- 2. Power on the **KIT**.
- 3. Plug the **USB-C** cable from the laptop to the power port on the **KIT**.
- 4. There will be a **USB** symbol that displays on the **KIT** letting you know they are connected.
 - v they

- 5. On the laptop, open the **GSPro Launcher** application.
- 6. The **GSPro Configuration** screen will then be displayed. Select the following:
 - Screen resolution should default to your screen's current resolution.
 - Graphics quality determined by your graphics card.
 - Select monitor when running on a multi-monitor setup, this will present GSPro on the selected (right or left) monitor.
- 7. Click **Play!** to begin.
- 8. Next, the **Connect Application** will launch. Select **Full Swing**.

- 11. The KIT will have light up Green 1x and the display screen will change to Full Swing Kit Game Mode. Once connected there will be a Green Checkmark in the top right corner next to the USB symbol.
- 12. <u>DO NOT CLOSE</u> the **Connection Application**. Just **Minimize** the screen so you can begin playing.

NOTE: If you close the **Connection Application**, you will drop your connection to the **KIT**.

The **Connection Application** must stay open during the duration of the game play!

13.Place the **KIT** 8 -10" from the hitting mat.

14. Begin Playing!

NOTE: Wi-Fi to the laptop is crucial for these two technologies to connect; ensure you have good signal when operating the Full Swing KIT Studio.
